KERBSTONE DRAINAGE CHANNEL MEAKERB

As a combination of drainage channel and kerbstone MEAKERB meets both requirements with flying colors. Thanks to side inlets with water drainage system the accruing rain water is quickly and efficiently drained off. Due to its elegant form in the upper area, the system also serves as a kerbstone edge and is perfectly suited for the different height requirements of bus stops.

Advantages

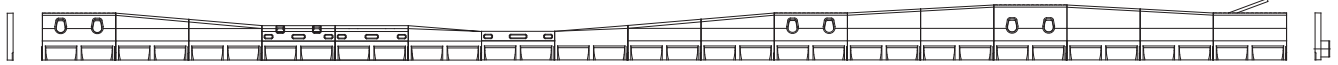

- ✓ Channel-kerbstone combination
- ✓ Loading class D 400
- ✓ Different versions also for bus stops
